

Automotive

For more than 40 years, AIS Vanguard has been providing specialist lifting, moving and industrial services expertise to the automotive sector.

The automotive sector is dynamic and competitive, with changes in technology, consumer buying habits and environmental compliance all driving the pace of change. Our aim is to support our customers in the automotive sector as they anticipate, manage and respond to that constant change, providing an experienced and service-driven industrial services partner that plans and implements projects around:

- + Planned shutdown periods
- + Site specific safety criteria
- + Business as usual operational requirements
- + Location specific access and egress restrictions
- + Lean production layouts
- + Process critical mechanical and electrical services

Whether you need help with routine operational activities or with a major project we can help. Our experience in the automotive sector includes:

- + Factory relocation and set-up
- + Asset rationalisation
- + Asset realisation
- + Asset optimisation and factory reconfiguration
- + Maintenance and servicing

Our experience in the automotive sector includes car and commercial vehicle manufacturers, OEMs, automotive component manufacturers, EV technology and battery manufacturers and all aspects of the supply chain. The automotive sector is an international industry with complex supply chains, import and export requirements. We are here to help with all aspects of your operational needs; from heavy lifting and moving, to ensuring consignments reach their destination on time, with the right paperwork, and in the right language. Whatever your requirements, we will provide a detailed method statement, accurate critical path and wide-ranging safety plan to ensure your project is delivered safely, on time and on budget.

Our services for the automotive sector include:

Machinery moves and removals

Heavy, technical and complex lifting

Decommissioning

Installation

Mechanical and electrical services
